

Project Opal Of Masters

("Projet Opale Des Maitres" in French/ en Français)

Author : LTHC The Master#5669 (on Discord)

Actual Platform : Minecraft Java Edition 1.16.3 & 1.16.4

Project Type : Datapack

Project Opal Of Masters (poom) :

poom is a minecraft datapack project which add some new mechanics/systems, events, recipes, villagers, advancements, dimensions and spells

First Mechanic // Drinks :

poom add a drinks crafter, this crafter is a multiblocks structure in wich we can craft some drinks. Structure and crafts in the next image

Second Mechanic // Siever :

poom add a siever which can decompose gravel, dirt, coarse dirt, sand, red sand and soul sand in some loots. This is also a multiblocks structure. Structure in the next image

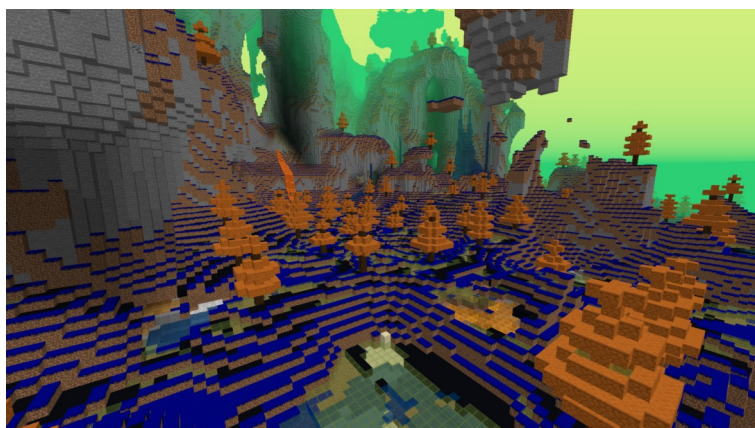

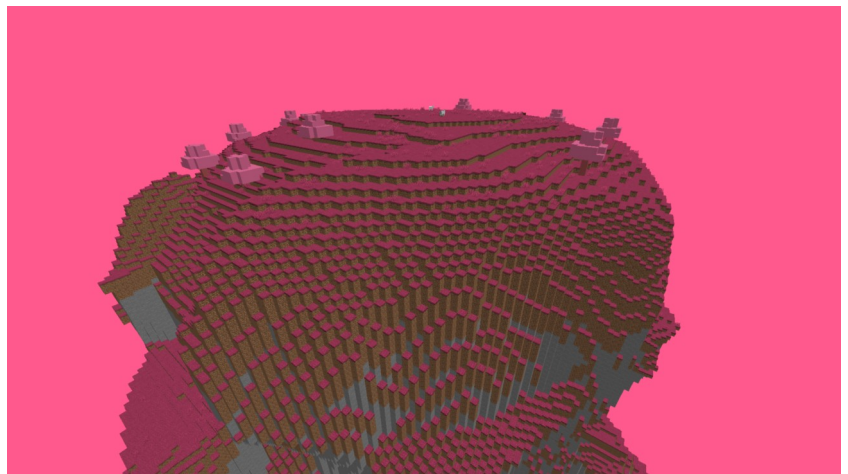

Third Mechanic // Loot Trader :

poom add a "Loot Trader", this system can trade some items to obtain some more or less interesting items by the power of the random. This is a multiblocks structure again. See the next image

Dimensions :

poom add two new dimensions. Dim1 is a dimension with End's floating islands and amplified world generation, it has a single biome which is very very very pink. Dim2 is a dimension with an amplified world generation, it has a single strange biome, a biome with some honey block lakes and other complex things.

Events :

poom add a lot of events, actually it adds 35 events

Villagers/Traders :

poom add 7 new special traders, 2 of them trade spells

Spells :

poom add only 5 spells but all spells are powerful

Freeze :

Cost : 500 mana points // Type : Elemental

Freeze all entities who surround* you*

*(limited and a bit large radius)

Lightning :
